Sick and Well Visit Policy

Welcome to **Pediatric Medical Group of Riverside, Inc.** We appreciate your selection of our office for your child's exam. PMG is dedicated to the delivery of quality health care and is committed to providing care consistent with the needs of the patient, community and health care environment.

During the course of a well visit, you can expect the provider to perform the following: a historical evaluation (of growth, nutrition, general behavior and developmental issues, sleep habits, and safety concerns) and a physical examination. The need for immunizations and/or other studies involving laboratory test, radiographic procedures, and other procedures or screening test may be suggested in the course of your child's routine well exam/that and may require outside services which will be billed separately.

Also, if an abnormality is encountered or a preexisting problem is added in the process of performing the well exam, and the problem is significant enough to require additional work or time by the provider, a separate office visit may be required to fully address the issue.

PMG's goal is to provide quality care! We understand that insurance details can be challenging. If you have any questions regarding your plan benefits or limitations, please contact your insurance carrier.
